

READY FOR THE RIDE

VERSE:

I know that it's been on your mind
I'm ready let me get in line
We dream about it all the time, we know
The past is never far behind

And I been waiting all my life to finally make a wish upon a star
So what you waiting for, for
And if you want it bad enough just close your eyes and dream it's never far
It's standing right here there you are

PRE:

Well we can dream a little bigger right now
If we open up our eyes

HOOK:

I'm ready for the ride
I'm ready to ignite just like the sun
The memories are all around
And I know we've only just begun

Prêt pour la balade
We'll never forget how far we've come
The memories are all around
And I know we've only just begun
I'm ready for the ride

VERSE:

It's a new beginning
Like a brand new place
Now the world is spinnin
Put that smile back on your face

Tinker bell, girl can't you tell
My happy thought has come true
Everything I wanted is right here with you
